

Drama

In Year 7 you will learn about different stage configurations in Drama. A stage configuration refers to how the audience is arranged in relation to the actors during the show. Using the internet to support your research try and identify the configurations below:

In Year 7 you will also perform short extracts from some of the plays of William Shakespeare. To prepare for this and build your knowledge try and tackle the following questions:

1. In which play is a ship sunk off the shore of an island? (Two possible answers here!)
2. In which play do a group of very bad actors try to put on a play?
3. Which play features the characters Caliban, Prospero and Miranda?
4. In which play does a forest 'move'?
5. Which play features a practical joke that is based around a faked letter?
